

The list of Albertian Professors

Some Albertians who have been elevated to the rank of Professor, or Associate Professor or Adjunct and visiting Professors (with a known full academic year) are listed below. A few have held other appointments of the same rank. In most cases the position is the current one, or the one held at the time of retirement. Some listed professors are deceased. If an academic moved into administration the last known teaching position is given. Some professors have or had named chairs; these are not given here. Institutions are fully named.

If you can add to this list please notify Brian Murphy at bmurphy@mags.school.nz
